This Is The Unique Hospital With Homoeopathy As A First Line Of Treatment Integrated With Modern Medicine To Serve Poor And Tribal Population.

Community Hospital, SPHMC SHRIRAMPUR

The Community Centre at shrirampur is a unique center, where the clinical services are integrated with the development activities for the community. Thus at this center, over & above the Outpatient department, Inpatient department, Casualty, we also have programmers on school education, organic farming, self help groups and warli art for a 'Holistic Community Development & Health Programmer

Our journey with them actually began in 2015. The realities of access to health care with potransportation, low priority on health, struggle for daily survival became an everyday experience for us. The realization became intense that the motto of the Trust 'to reach the unreached' could

only be possible if doctors went to patients rather than patients coming to doctors. Today, all these continuous and dedicated efforts have allowed us to touch the hearts of the self respecting, underprivileged, poverty stricken tribal community. We have launched a pioneering and unique programmed of "Homoeopathy based barefoot doctors" which trains the tribal women as community health volunteers. The CHVs are the bridge between the community & the organization. They have formed the bedrock of our efforts to take the community on the path of health. CHVs are trained to provide first aid, promote ANC & institutional deliveries. The Department of AYUSH has recognized this programmed as a Model Programmed for providing Mother and Child health through Homoeopathy nationwide
